

NEURORADIOLOGY WORKSHOP

for STROKE PHYSICIANS

www.neuroradiologyworkshop.com

- An interactive one day course designed for Stroke Consultants and Senior Trainees.
- The course will be delivered as an interactive workshop with viewing of imaging on individual workstations using OsiriX software which mirrors daily practice.
- During each session delegates will be given time to study an array of challenging stroke cases that they may encounter in their everyday practice. These will then be reviewed with short summaries emphasising key learning points with practical tips. Delegates will have an opportunity to ask questions.
- Topics will include interpretation of CT, CTA, CTP, and Case selection for Mechanical Thrombectomy.
- Maximum 15 delegates each day to ensure a more interactive experience

Date: 10th/11th November 2021

Location: London

Cost: £375

**The Royal College of Radiologists Has Awarded
6 CPD Credits**
